

NEW HOLOPHANE FULL CUTOFF SERIES LUMINAIRES OFFER VINTAGE LOOKS, LONG LIFE
Fixtures Promote Sustainability and Reduce Sky Glow

GRANVILLE, Ohio (4/22/10) – New Holophane Full Cutoff Series LED luminaires combine a vintage appearance with the sustainability and reduced life cycle costs associated with LED technology. Lantern-style Arlington® LED, Postop LED and Washington Postlite® LED luminaires incorporate nighttime friendly optics with strict light control for areas concerned about sky glow.

The fixtures' precision optical system is comprised of a board with a series of 63 high output LEDs, which maximize pole spacing while maintaining uniform illumination. System optics are designed to provide an IESNA asymmetric or symmetric full-cutoff for design flexibility.

Fixture LED light output and system life are optimized through proper thermal management, with a dedicated heat sink mounted into the luminaire to pull heat away from the critical LED components. The Ingress Protection (IP) rated optical chamber is totally sealed to remain clean and functional.

Full Cutoff Series LED luminaires offer other cost saving and performance features:

- Tool-less maintenance and access
- Robust die-cast aluminum housing
- Plug-in electrical module contained within an IPSS rated electrical enclosure
- Polyester powder paint finish applied after a seven stage pretreatment process to ensure maximum durability

“Holophane’s new Full Cutoff Series LED luminaires result from extensive research and development to ensure reliability and longer life,” said Ben Prichard, Sr. Product Manager, Holophane Period Outdoor Products. “The fixtures’ unique housing design eases installation and maintenance, which helps to reduce the units’ lifetime costs.”

Full Cutoff Series LED luminaires are ideal for any environment where aesthetics and cost effective, reliable performance are desired, including city streets, parks, residential areas, campuses, walkways and parking lots. The fixtures are UL listed for wet locations with a maximum 40° ambient temperature, and are offered in black, bronze, green, white or with custom colors to enhance any landscape.

For more information about Holophane Full Cutoff LED luminaires or any product in the company’s decorative outdoor lighting series, visit www.holophane.com or call 866-759-1577.

States with active lighting ordinances include Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Hawaii, Maine, New Mexico, Rhode Island, Texas, Vermont and Virginia. Many local communities also require or prefer IESNA Full Cutoff lighting.
