## **NEW HOLOPHANE PRAGUE® LUMINAIRES ADD SPARKLE TO LANDSCAPE** *Fixtures Offer Durability and Efficient Performance*

GRANVILLE, Ohio (Date) – Holophane adds elegantly styled Prague yoke mount luminaires to its line of contemporary, Euro-styled GlasWerks® II outdoor lighting fixtures. The new yoke mount units complement the pendant mount Prague fixture, offering the same robust construction and ease of maintenance for efficient, low cost performance.

Prague yoke mount luminaires feature permanent glass optics with an attractive choice of cylindrical glass, sag glass, prismatic glass bowl, tear drop glass or flat glass. The fixtures may be used with a wide selection of low and high wattage lamp sources in high pressure sodium, metal halide and induction.

The luminaires are available with asymmetric and symmetric lighting distributions and IESNA full cutoff, cutoff and semi-cutoff, which make them ideal for municipal streets, commercial plazas, retail centers, college campuses, waterfronts and residential districts.

“Like other luminaires in the GlasWerks II family, yoke mount Prague combines the sparkling performance of borosilicate prismatic glass with an appealing seamless profile and state-of-the-art mechanical design,” said Ben Prichard, Outdoor Senior Product Manager for Holophane.

Prague luminaires are offered with black, green, white or bronze housing to enhance any landscape. The luminaires are available as urban and pedestrian scale units for boulevard and area applications.

For more information about Holophane Prague yoke mount luminaires or any of the company’s GlasWerks II outdoor lighting fixtures, call (740) 345-9631.
