NEW HOLOPHANE WASHINGTON POSTLITE LUMINAIRES OFFER FULL CUTOFF TO ELIMINATE LIGHT TRESPASS

Fixtures meet communities' needs for decorative systems without uplight

GRANVILLE, Ohio (May 2009) – New Washington Postlite® Full Cutoff (WFC) Utility Series Luminaires from Holophane offer Nighttime Friendly® optics and IES full cutoff distributions to meet communities' needs for lighting systems without sky glow or light trespass. The fixtures' new optical design includes an anodized segmented reflector system to provide precise light control with superior uniformity and zero uplight.

“Holophane took great care to engineer and design the look of the Washington Postlite Luminaire to emulate the profile of the standard Washington Postlite fixture,” said Ben Prichard, Outdoor Senior Product Manager for Holophane. “The new luminaire ensures the same aesthetic appeal and outstanding performance that have proven popular over the years.”

Other luminaire features include horizontal lamp orientation, IP rated optics, and asymmetric and symmetric distribution options. The Washington Postlite Luminaires are field adjustable and have Holophane's new fluted M-type electrical housing with door-mounted ballast components, allowing units to be serviced without tools. A pre-wired internal terminal block and internal photocontrol receptacle facilitate maintenance.

Holophane's new Washington Postlite Utility Luminaires may be used with a wide choice of low wattage lamps, including 50- to 175-watt high pressure sodium and metal halide and 42- to 70-watt compact fluorescent. Fixture housing is available in black, bronze, green, white or custom colors. Ornamental finials may be ordered as spikes or balls.

Washington Postlite Luminaires may be used in a range of applications, from parks and city streets to college campuses, residential neighborhoods, boulevards and village squares. For more information about Holophane's Washington Postlite Utility Luminaires or any product in the company's decorative outdoor lighting line, call (740) 345-9631.
