UTILITY OUTDOOR LIGHTING SEMINAR

September 24-26, 2012

A two day seminar geared toward Utility personnel with a full range of topics for outdoor lighting. Start with the fundamentals of lighting, optics and ballast operation. Learn about the requirements for outdoor lighting as spelled out in the IESNA Recommended Practice for Roadway Lighting, RP-8. See LED luminaire for highway, street and parking applications. See a working glass plant. Tour a research facility and learn the steps to design and test new lighting products. See, touch and feel high performing and easy to maintain luminaires. Enjoy the sites, sounds and good food of the quaint, New England-style village of Granville.

PROGRAM HIGHLIGHTS

- Fundamentals in Lighting, Optics, Ballasts, LEDs
- RP-8 and Roadway Lighting Design
- Remote Operations Asset Management
- Holophane Infrastructure and Decorative Products
- New Technologies like LEDs and Induction
- Night Time Demonstrations
- Plant and Testing Tours
